NUTRILAC[®]

What is NutrilaC?

NutrilaC, NutrilaC Plus, NutrilaC-S

A special nutritionally complete liquid meal with high energy content and low lactose, intended for a dietary approach during malnutrition associated with illness. Intended for administration by sipping or feeding tube.

Advantages of NutrilaC Nutrition:

- Delightful natural flavor
- Excellent tolerability
- Produced from milk sources
- Excellent sensory characteristics
- Optimal ratio of nutrients, vitamins, and minerals
- Great price
- Tested with physician trials
- Manufactured in the Czech Republic
- Wide range of different type of packaging

Vitamins:	Minerals:
vitamin A	K/Na ratio
vitamin D	sodium
vitamin E	potassium
vitamin K	chlorine
vitamin C	calcium
vitamin B1	phosphorus
vitamin B2	magnesium
niacin	iron
vitamin B6	molybdenum
folic acid	zinc
vitamin B12	iodine
biotin	copper
cholin	manganese
pantothenic acid	selenium
	chromium

Expert opinion:

NutrilaC fulfils all the requirements for complete enteral nutrition with all necessary macro and micro nutrients in its many flavor varieties produced in the Bohusovice creamery. It is based on milk protein, which is the most natural and thereby the most physiological source for human consumption. However, the product also respects the fact that many people with intestinal problems or advanced age can experience lactose intolerance, conditioned by a shortage of the digestive enzyme lactase. Thanks to its reduced lactose content, NutrilaC is appropriate for persons who don't tolerate it well.
